

SPORT ASSAY

A Personalized Sport Medicine Test

There are considerable inter-individual differences in most parameters important in sports medicine & sport performance

SPORT ASSAY is a molecular test supporting:

- Prediction of Health-Related Training Effectiveness in Preventive Sport (like cardiovascular risk factors)
- Assessment of the fatigue status of athletes
- Talent identification for sport
- Determining risk factors for sport injuries
- Personalized sports nutrition

Decision Making Meeting on
Personalized Sport Medicine

Ultimate Goal

Improving Your Sport Performance based on Your Molecular Profiling

SPORT ASSAY Can be performed in the following options:

- **SPORT ASSAY** *Basic*
- **SPORT ASSAY** *Advanced*
- **SPORT ASSAY** *Premium*

Based on our long standing technical, scientific and medical experiences, we and our partners as molecular pathologists and experts in molecular and cellular medicine are proud to provide our athletes a professional medical service in the field of precision diagnostics and personalized sport performance.
